# INTRODUCTION TO ZAMAQO

Mitigate risks early with our expertise, led by seasoned software quality assurance engineers. Invest wisely by addressing issues before they become costly. Make proactive steps toward long-term efficiency.

*“We strive to deliver quick turnaround times without depth and compromising on the quality of the testing.”*

## WHAT MAKES US DIFFERENT?

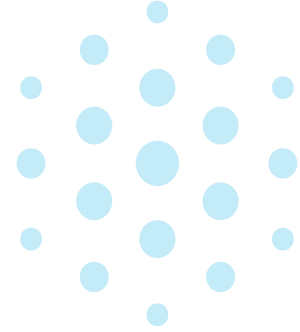

We offer our clients the ability to have their software independently monitored & tested by us, to get a balanced and independent review as well as testing services of web applications, desktop applications or mobile applications.

No matter if you want us to check a single website, your web application, a mobile app or your e-commerce web shop, we are here to help.

At Zamaqo, we have a team of experienced and professional Software QA's and testers who are experts in their field. We are equipped with internally developed proprietary tools and methodologies to ensure that your software is of the highest quality.

Receive detailed reports outlining our findings, empowering you with insights to make informed decisions.

## WE DO

### Manual software Testing

Our manual testing services involve testing your software to ensure that it is functioning by design and meeting your required specifications. Our team of experts has years of experience in manual testing and can help you identify any issues with your software.

### Automated software monitoring & testing

Our test monitoring & automation services help you reduce costs and increase efficiency by automating your monitoring and testing processes. We use proprietary software written and developed by Zamaqo in order to deliver our services in a highly efficient manner.

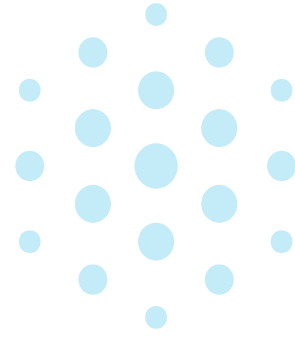

### Mobile software Testing

Our mobile testing services help you to ensure that your mobile applications are working correctly and meeting your requirements. We have a team of experts who can help you identify any issues with your mobile applications.
